FYI...OST is seeking peer review on draft risk assessments for PFOA and PFOS and is looking for Regional comment on the communications material, esp of note since R5 and R3 have AOCs with DuPont based on the preliminary health advisory numbers.

Attached please find draft communication materials for your review on the peer review solicitation FRN for the draft PFOA and PFOS human health risk assessments. In some of the documents I have indicated particular places where we'd like your region's input, but we welcome comments on all areas of the comm documents. If you can reply to all with Track Changes comments or edits by 11/22/13, I'd greatly appreciate it. We have tentatively targeted 12/18/13 for publication of the FRN.

As background for you and your regional drinking water/human health program counterparts (copied on this message) I am also attaching the draft risk assessment documents and the charge questions to the peer reviewers. Feel free to redirect this email to a more appropriate program person in your region if I didn't get the right one for this particular product. If you have questions about these technical documents, please contact Beth Doyle and Joyce Donohue.

Thanks and enjoy the long weekend,
